

TECHNO PPR FITTINGS

Product Description :

Techno PPR fittings and PPR Brass metallics fittings are made of polypropylene random copolymer PPR as per the standard ISO 15874-3 and DIN 16962. Polypropylene is the most reliable material has excellent characteristics rigidity, homogeneous joints, high temperatures resistance. Hence PPR piping system shall preferred for safe and reliable long-lasting life in hot and cold-water distribution, Techno Plastic Industry S.A.O.C. proves to be the most trusted piping system.

CERTIFICATION:

OPERATING PRESSURE:

For Cold water application: 25 bars at 20°C

For Hot water application: 12.5 bar at 70°C

(Max 95°C for short peak)

For 50 years life span.

TECHNO

ADVANTAGES :

- Corrosion Resistance
- Ease of Installation
- Low Maintenance

TECHNO PPR GREEN FITTINGS

Specifically for Indoor Installation:

- Suitable for hot and cold-water installations.
- Residential, Industrial, and public projects
- Agriculture

TECHNO PPR BLACK FITTINGS

Specifically for Outdoor Installation:

- Residential, Industrial, Commercial & Agricultural Plumbing Installations
- Some fittings such as Plastic unions/Plastic ball valves are suitable only for low pressure 10 bar at cold-water application
